

Dear Dr. Kaminski,

Thank you for your time on the phone this morning. I have truly enjoyed my relationship with UCONN and its students over the past few years. I am eager to continue and build upon that relationship for the future.

As we discussed, we have some immediate opportunities available for the 2008 season. In addition, some of the exciting upcoming events at Medinah include renovations to Courses 1 and 2, renovations to our Practice Facility, a new maintenance building, and the 2012 Ryder Cup.

This year's internship program will consist of all golf course maintenance activities. There will be a focus on maintenance and operation of our irrigation system, chemical and fertilizer applications/calibrations/record keeping, bunker renovation, multi-course operational techniques, and staff supervision. We of course, will always customize a learning experience based on the individual needs of the student. We will provide housing and the rate of pay will be between \$10 and \$12 per hour depending on experience.

Should you have any students interested in Medinah, please have them forward their information to me at the following address:
